

TRANSFORM YOUR BRAIN MR IMAGING WORKFLOW

OUR CLINICAL VALUE

- ✔ Simplify MR image acquisition
- ✔ Improve technologists' confidence
- ✔ Free up radiologists' time
- ✔ Ensure timely diagnosis of critical findings
- ✔ Reduce patient recalls

SMART ALERT*

Smart Alert detects critical findings during the MRI scan, enabling the prioritization of radiological review and the prompt notification of the care team.

Your benefits

- ✔ Ensure identification of critical findings
- ✔ Reduce report turnaround time and time-to-treatment
- ✔ Less patient recalls by immediate notification

SMART PROTOCOL*

Smart Protocol analyzes an abbreviated set of images and suggests the most appropriate next sequences based on initial findings while the patient is still in the scanner.

Your benefits

- ✔ Support MR technologists in performing specialized brain protocols
- ✔ Free up radiologists' time by ensuring the right data
- ✔ Reduce patient recalls for additional imaging

* Smart Protocol and Smart Alert are CE-marked as part of Apollo 2.1.1 (2-2031-4). For investigational use only in the US
